

MicroClean 95 CG Whole Home "Micro Particle" Hybrid Air Cleaner

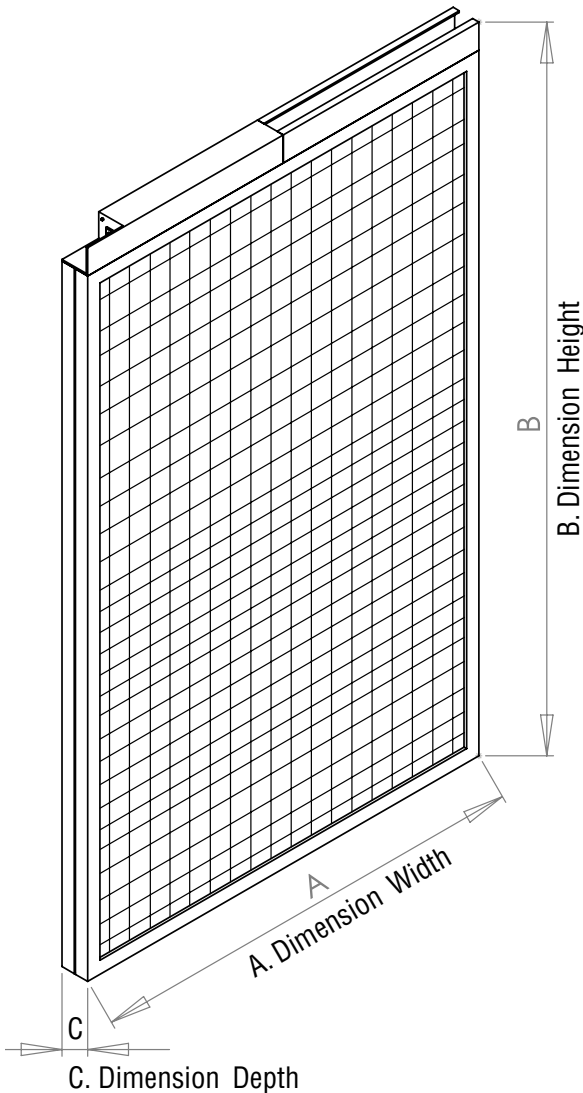

The Evolution of Indoor Air

- Patented air cleaning technology
- Fits any 1" slot, filter rack or return grill
- Low static
- Carbon Graphite charging system
- Waterproof electronics
- Low voltage electronics
- Only 2 watts of power
- Simple maintenance
- Independently ASHRAE tested
- 95% efficient down to 1 Micron
- Fastest, easiest retrofit air cleaner
- Maintains system energy efficiency
- High voltage with quiet operation
- Reliability in high humidity
- Natural, safe, electrical processes
- Green energy usage
- Replace internal pads when dirty
- Proven performance

5 Year Warranty

MicroClean 95 CG Hybrid Air Cleaner Technical Engineering Specifications

- The air cleaners are to be powered by 24 volts AC or DC.
- They will draw less than 0.1 amp (.064 amps) & consume 2 watts in total
- Air cleaners can be wired for constant on (non ozonating)
- Air cleaners have aluminum frames for rigidity, corrosion resistance & UV resistance
- Electronic power heads are located on the first (A) face dimensions unless specified otherwise
- Tandem Powerhead wiring is available for multiple unit connection
- Air cleaners use Class 1 dry media pads of progressive density, no colour dye, no sprays or dipped adhesives - hypo allergenic
- Air cleaners are CUL labelled and listed for electrical safety
- Air cleaners are ASHRAE tested
- 95% Efficient down to 1 micron Equivalent to MERV13
- Voltage range: 22 volts to 32 volts

CG ELECTRONIC AIR CLEANER UNITS

NOMINAL UNIT SIZE DIMENSIONS	ACTUAL UNIT SIZE DIMENSIONS	UNIT ELECTRICAL SPECIFICATIONS	AMP DRAW	STATIC PRESSURE
12" X 24" X 1"	11 5/8"W X 23 5/8"H X 5/8"D	24 volts - Max 2 watts	Max 0.1	.15"W.G
